

Climate Change Evident in MN Landscape

February 2, 2010

Presented by
The Rochester Izaak Walton League

“We’re into climate change now, and we’re starting to see the results in Minnesota.”

Lee Frelich, director of the U’s Center of Hardwood Ecology quoted in Pioneer Press

Dr. Lee E. Frelich will be discussing how climate change is already affecting MN forests.

Lee Frelich is Director of the University of Minnesota Center for Hardwood Ecology. He received a Ph.D. in Forest Ecology from the University of Wisconsin-Madison in 1986. Frelich teaches courses in Forest Fire Ecology and Landscape Ecology on St.Paul Campus. Frelich has published numerous papers on forest ecology and has been listed among the top 1% of all scientists in the world in the Science Citation Index, Ecology and Environment Category. He has appeared in the news media 200 times including /The New York Times/, /Newsweek/, /National Geographic/, and many TV and radio stations. Current research interests include fire and wind in boreal forests, long-term dynamics of old-growth hemlock and maple forests, invasive earthworms in forests, and global warming.
